

CAURUM
Recover . Refine . Transform

the **C**
IMPACT

CRUCIAL

After 34 years,
Evolution starts now.

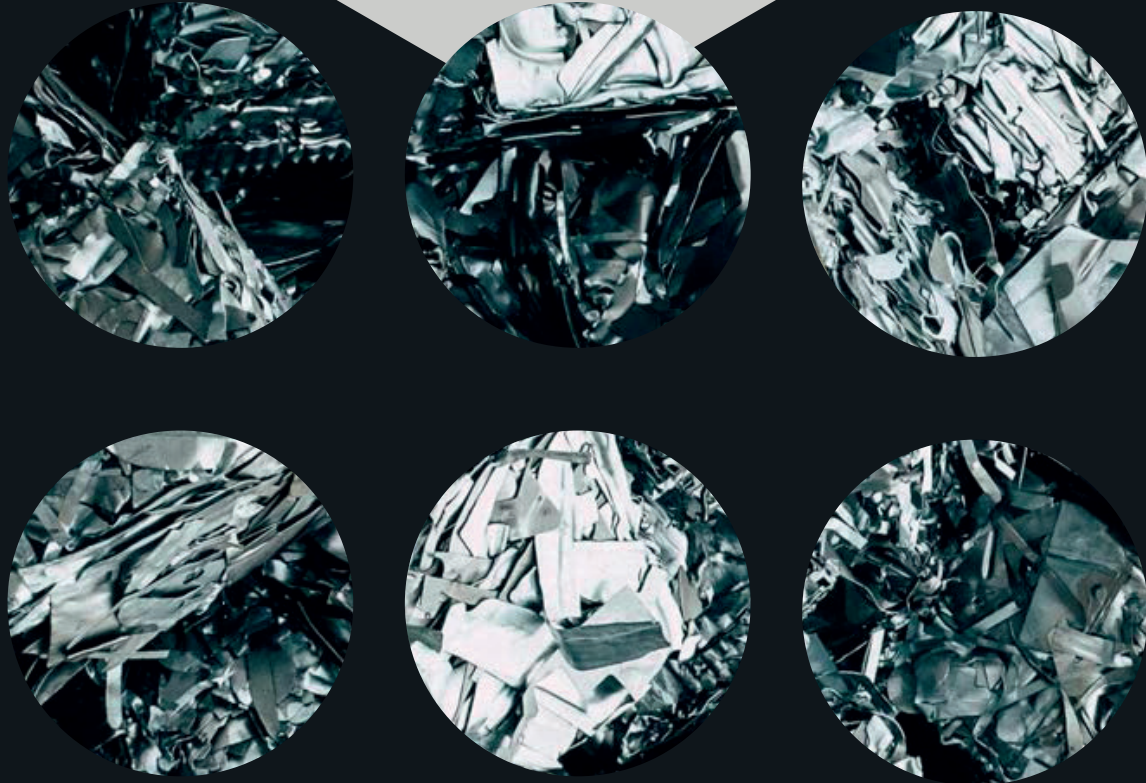

COMPETENCE

Transformation
will be our future.

CIRCULARITY

Why?

Because we treat
Precious Metals
as an Infinite Resource.

CONSISTENCY

What we do.

Recovery and Refining of precious metals
Transformation into products
Trading

How we do it.

Tailor-made services
Complete fulfillment of hazardous and non-hazardous regulations
Expert guidance to research & development
Constant involvement for the best result
Multilingual customer support
Internal lab and logistics for a greater efficiency

Caurum products

Recover . Refine .

JEWELLERY

Precious metal alloys (bars), production scraps (fillings, lime, shavings), waste (muds, crucibles, slags, exhausted coals)

WEEE | electric and electronic

Gold, Silver and Palladium used to make electronic circuits and hardware components.

CATALYTIC

Precious metals-based catalysts, both fresh and spent, petrochemistry, pharmaceuticals, automotive and other processes of industrial synthesis are included in the catalytic industry.

GALVANIC

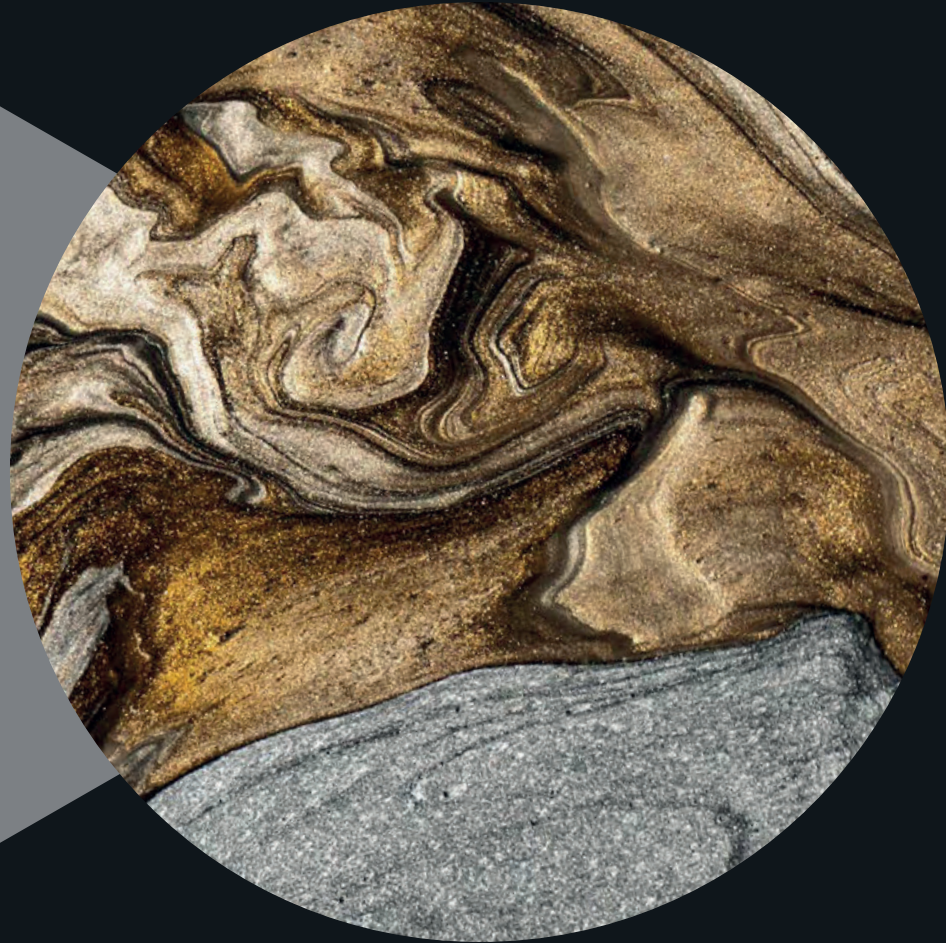

Exhausted baths, galvanic muds, wires and frames with precious deposits, coals and exhausted resins.

AUTOMOTIVE

Waste production, products that have not passed quality control, spent catalysts.

DENTAL

Noble dental alloys containing precious metals (Gold, Silver, Palladium and Platinum) directly from the manufacturing companies (from waste and alloys that have not passed the quality control), but also from collectors, dental technicians or dentists.

Transform

PURE METALS

Precious Metals

VALUE

Trading at disposal

CAURUM PRODUCTS

Transformation into semi-finished products: salts or solutions containing precious metals tailor-made.
